Hypervsn is a revolutionary media solution for creating, managing and displaying 3D video content with holographic effect.

It is a unique combination of a hi-tech projection unit and a proprietary management platform that allows to upload content wirelessly and manage all devices remotely from a single location.

HOLOBLADES

AVAILABLE IN 75cm AND 56cm

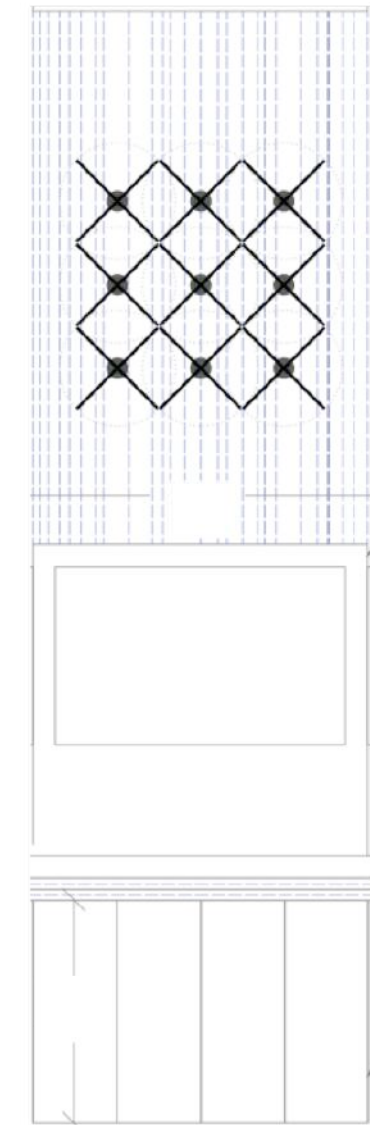

HOLOBLADES

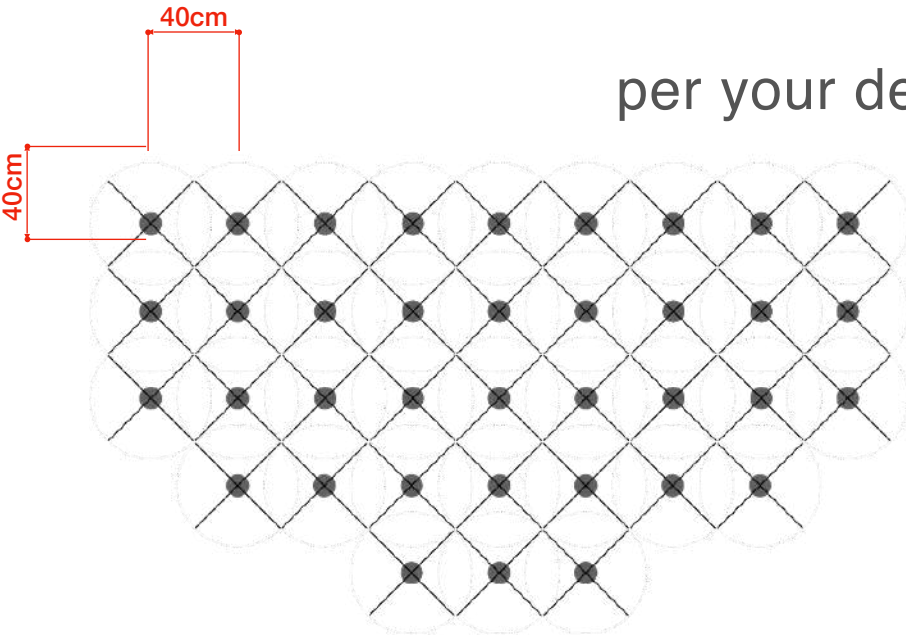

Hypervsn cluster wall enables a more scalable solution for 3D holographic displays, with 56cm holoblades.

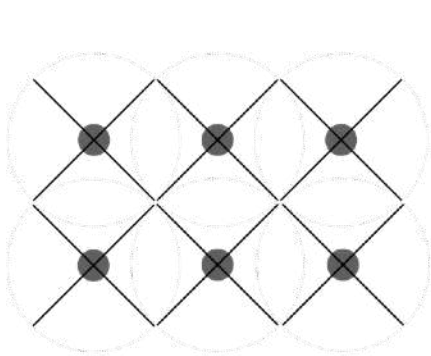

We have existing configuration templates which you could use, but it could be modified and clustered as per your design.

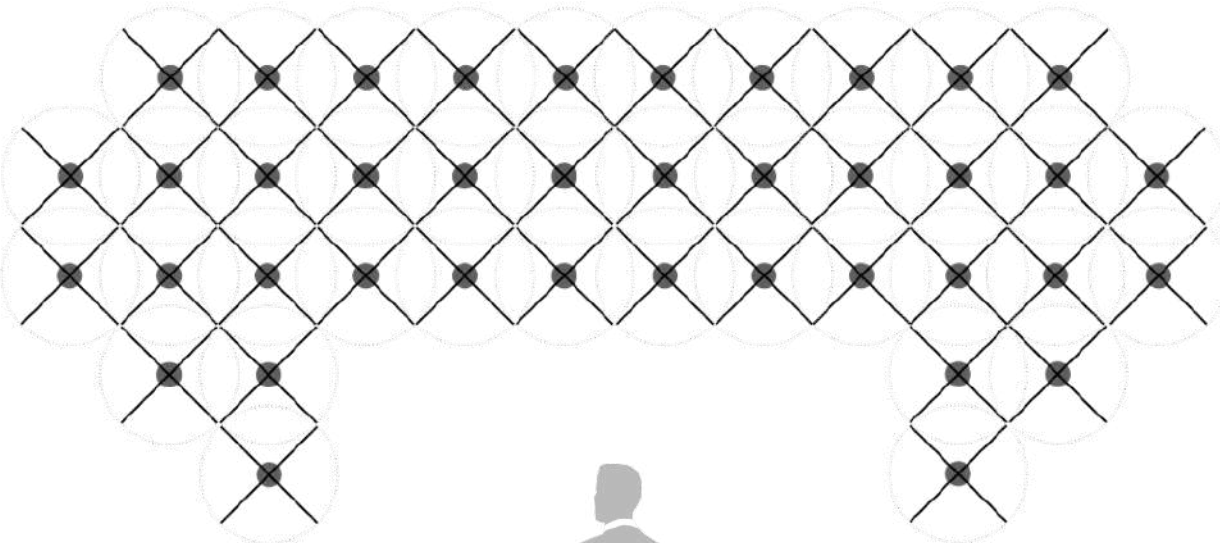

CONFIGURATION A

CONFIGURATION B

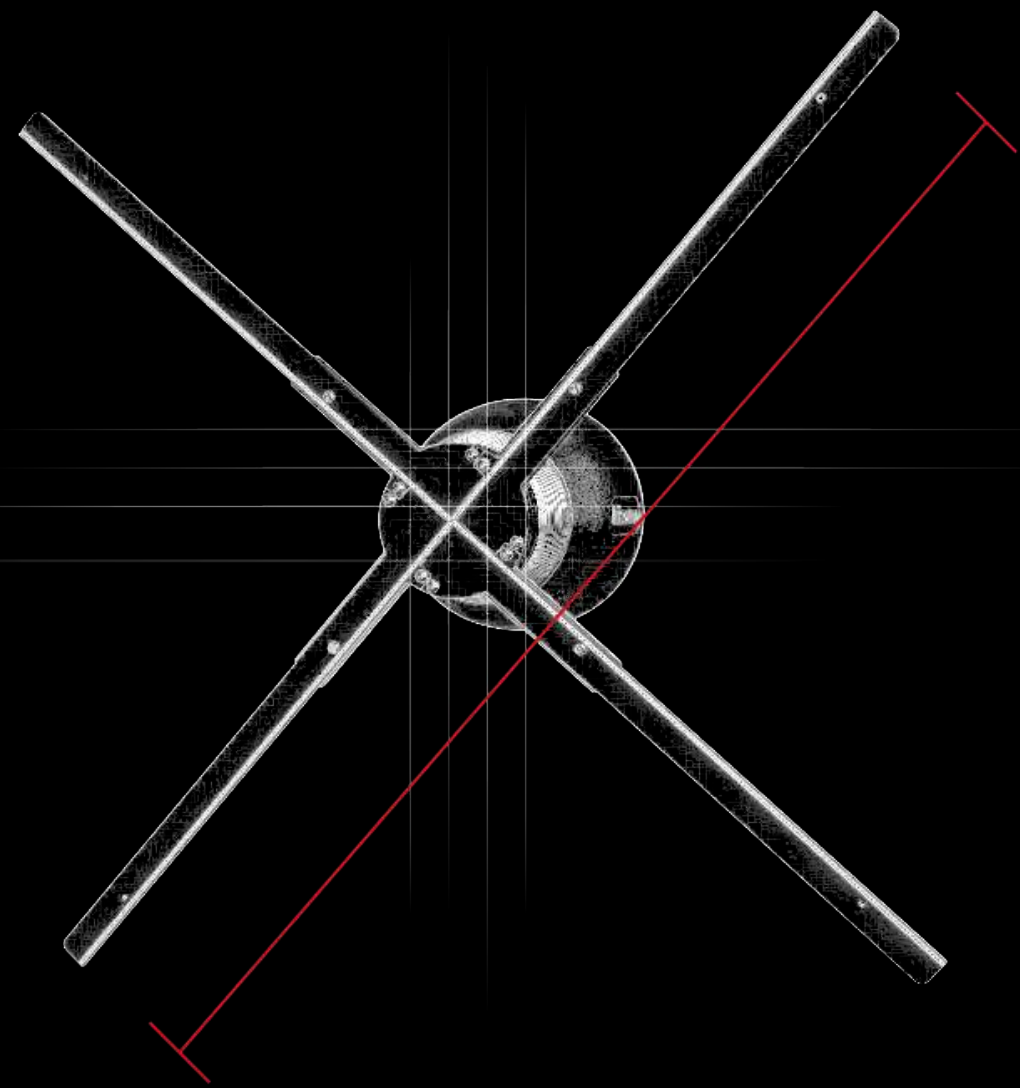

CONFIGURATION C

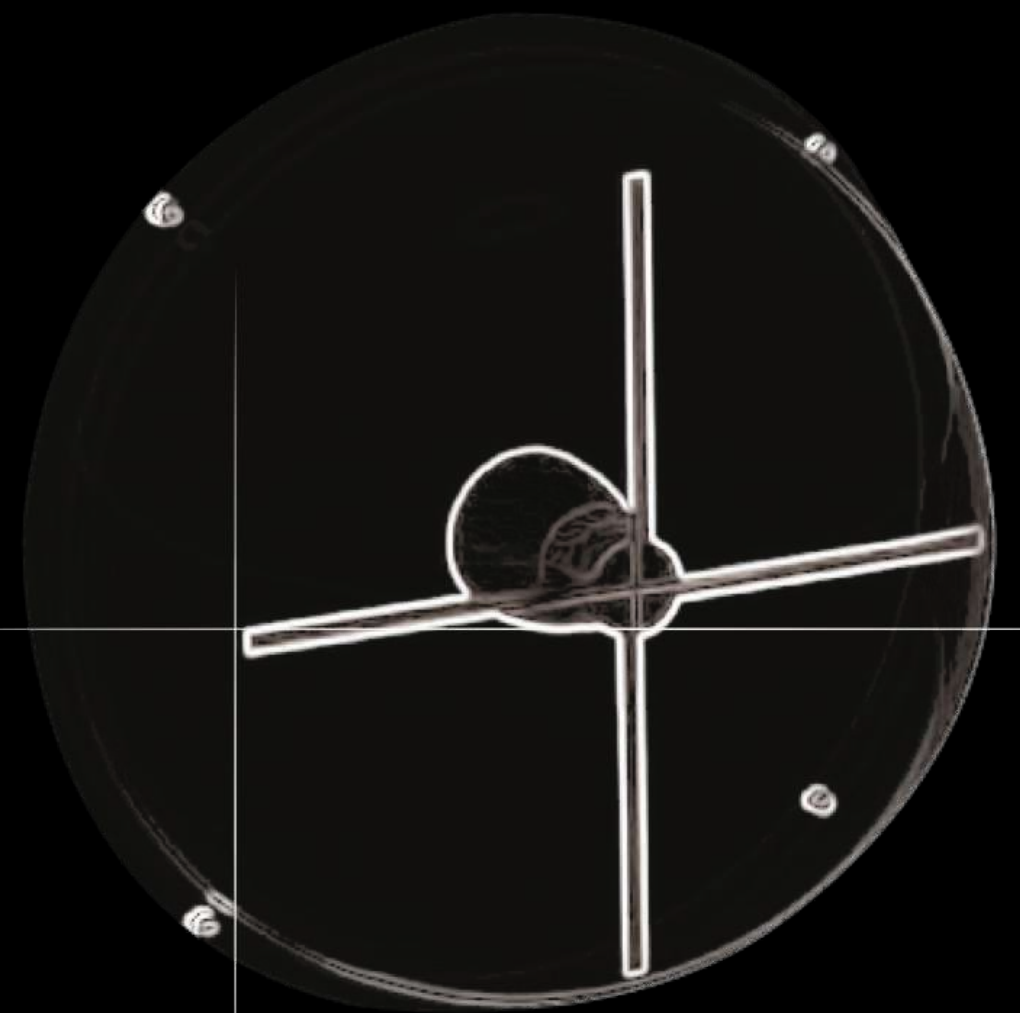

CONFIGURATION D

PRODUCT INFORMATION

- Max. image size 750mm
- Number of LED rays: 4
- Rotational Speed: 670 RPM

The HYPERVSN Dome L is designed for static mounting as a protective barrier for Solo L (75cm devices). This optional Solo accessory safeguards devices without compromising on their revolutionary holographic effect.

- Safer for installations in audience reach
- Scratch & damage resistant
- Crystal-clear viewing clarity
- Can be fixed on a wall or used with the Solo Floor Stand
